

Important

The overall frame size is a rounded number

The visual fabric size is 6mm smaller

The inclination of the fabric (2 x 3mm) adds the 6mm back to the fabric making the dimensions of the overall frame size and the to be ordered fabric the same

The silicon edge is added by 2dp in the normal manner
(+10mm for a silicon edge that is 14mm - giving a tension of 4mm per side)

AluVision - Sub Box Dimensions
