

Adding cutline for door frame

Add cutline (red in example) in reverse U shape

Offsets:
Left: -78mm
Right: -78mm
Top: -80mm
Bottom: flush with frame

Silicone edge inside:
Already calculated

Silicon edge outside:
will be automatically added by printer

Example of Door Frame inside larger wall

Wall consisting of multiple frames

Resulting file (3968mm x 2976mm) with cut-out

Cropping of the door itself

When solid color simply take required size

When continuous image crop image

Offsets for cropping:

Left: -71mm

Right: -71mm

Top: -74mm

Bottom: - 10mm

Silicon edge outside:
will be automatically added by printer

Door is always separate from doorframe

-> door + silicone edge is larger dan inside door frame
